NEW YORK, May 2.-Today's stock market was peculiar in more ways than one. It was active, it was strong, and it closed higher, but the activity, the strength and the advance were not in the old-time leaders. The attention of the boomers was turned to the securities that are usually trailers in the upward movement and not leaders. The Great Northern and Union Pacific shares were again an exception to the other rule, for they did share in the strength to a moderate extent, and St. Paul was in this group, but Reading, Northern Pacific, Pennsylvania, New York Central, Smelter, Copper, Steels, and many other industrials were entirely ignored in the upward movement. Stocks are being jacked up by main strength, and not through any favorable change in the situation. They are strong in that it might be wise to buy them on reactions and sell on strong spots. In the usual influences that govern conditions theer is lacking almost everything that goes to give strength to a market.

In searching for a cause for the gain. the old-time leaders. The attention of

a market. In searching for a cause for the gain, the old tariff was picked up as being, at least, partly responsible. "Owing to the Government deficit, there will probably be no action on the lines of tariff revision during the next two years." Just why the tariff should effect the rails and not the industrials is something of a puzzle.

The crop outlook is excellent. That's a bull argument, but it is not sufficien to offset poor railroad earnings, the largest number of idle cars in the nation's history, the depression in general business and the public indifference to the course of the security markets.

By Main Force.

There is a reason, and it is found i manipulation and main force and with these weapons and jacks the market is being screwed to a higher level, and for stock distributing purposes.

The cut in the ePnnsylvania dividend from the usual 7 per cent, per annum, to a 5 per cent basis was said to be another buil argument. Perhaps it is, but the stockholders of the company fail to see it in that light. Unquestionably the action was conservative—in fact, wisdom. But a buil argument—not.

The table of advances at the head of this column show the changes for the better. There were no declines worthy of mention. The public is nibbling at the market and a down ward turn would cause them to quiet and abandon the market for a time. This is evidenced by the fact that there are always deserted brokers' offices on a declining market, while the ticker doesn't turn them out fast enough when the market is advancing and the "sitters" chairs are occupied to the limit of capacity.

The short interest is limited and this is an unfavorable feature. nanipulation and main force and wit

The Safest Investments Are those that do not fluctuate during disturbed conditions of the money or stock markets. First deed of trust notes (first mortgages), well secured on real estate in the District of Columbia, constitute "gilt edge" investments. They do not depend upon the financial responsibility of individuals or corporations for their stability, and are exempt from taxation as personal property. We can supply such investments in amounts from \$500 upward. Send for booklet. "Concerning Loans and Investments."
